Implementing features such as room booking, check-in/check-out functionalities, and generating invoices. Integrating error handling and validation to ensure data integrity and system reliability

**Responsibility:**

- Contributed to the full desktop application development lifecycle from planning, requirement gathering, development, testing.
- Played a key role in writing application logic using pycharm.
- Worked as both designer as well as programmer to develop.
- Conceptualized, designed and developed for learning purpose.
- Programmed with python and tkinter.
- Tested the application on multiple desktop targets and debugged the issues that were found.

**Portfolio Website**

I created a professional website to serve as an organized and dynamic portfolio, showcasing my skills and accomplishments in web development. The platform is designed to provide a comprehensive overview of my background, including my educational qualifications, technical expertise, and a collection of my projects.

Each project is presented in detail, complete with descriptions, visuals, and insights into my role and contributions. The website also features a dedicated contact section, making it easy for visitors, potential clients, or employers to connect with me.

To ensure it is easily accessible, I have hosted the portfolio online, allowing anyone to view my work at their convenience. This project highlights my ability to design and develop functional, visually appealing websites while also emphasizing my dedication to creating a strong professional presence.
